Our honored guest

Distinguished Professor of Chemical, Biological and Industrial Engineering & Management Sciences.

His current research focuses on the development of advanced computational models, optimization algorithms, and systems analysis tools for practically important and fundamental problems on process engineering, energy systems and sustainability.

He has published over 130 papers and edited/authored 3 books.

Member of the AIChE Sustainable Engineering Forum and the AIChE Computing & Systems Technology Division.

Prof. Fengqi You
AIChE?

- American Institution of Chemical Engineers
- Professional society founded in 1908
- Non profit organization with more than 45000 members over 100 countries
- Provides leadership to the Chemical Engineering profession
- Upholds high ethical and working standards
- Continuing education opportunities for chemical engineers (e-learning, etc.)
- Conferences, publications, databases...
- International AIChE student membership
- AIChE annual meeting

AIChE is Everywhere

---

**Program**

1. Introduction by UPC BCN AIChE Student Chapter
3. Report of the current situation of the Student Chapter and future work.
4. Closure and refreshment

---

**Chapter current situation**

- Specialized commissions.
- Several projects underway.
- Growing media coverage

- Looking for financial support and sponsors.
- Looking for visibility.
  - Academia
  - PEESE Community
  - Student associations
